My Dear Engelmann.

I thank you &
Dec. 30th — Wife and I
send many thanks
for your kind wishes.

Fendler wrote me
at the time the box
was despatched by Wim-

My dear Engelmann

I have received some determinations of Fendler Venezuela plants, by Prof. Munro. After copying, send the sheet to Dr. Short of Louisville, to be returned to me.

I am enjoined to say that the box of Fendler containing your envi to Dr Bradbury sent long ago by Rail Road, has not yet come to hand.

I have here no indication on which to found enquiries. Let Fendler make enquiries and get some clue, at St. Louis, or sue the R. R. for the loss.

No particulars news. I write you last. Ever Yours

My Dear Engelmann.

I have been so
constantly occupied and driven

but found it not, and I
thought I had already sent
it another way.
But now, it has turned up

sending by itself. But, as
soon as Eaton comes here
to help me, he will distri=

then there will be a fit to send

you, and all may go in

I take the last

My Dear Engelmann

Yours of June 12, July 12 still unanswered - at least the latter, and now comes yours of July 1.! What a bad conspondent I am getting to be!

College & kept me very busy indeed till 2 weeks or so ago, - and an accumulation of things ever since. At length - while the savans are at Newport, I am getting ready to sit down to quiet work here. And tomorrow Dr. Gray, on a little visit, but that will not hinder work much.

Numerous accessions have come in for my herbarium during the year past, a large part still undistributed. I am sinking at more than a foot deep in the Compositae of Wilkes' Exped.

We had Douglas here at Commencement, & were attentive to him in a quiet way.

You ask about the politics. We take it very quietly here, merely look on and see the demovrats fight each other. It is rare fun, and is doing our work in a quiet and easy way. There are some of our club to vote for Bell, some for Lincoln, Reiss is abroad, and will hardly be back in time to vote for Douglas. I do not know what Evans Davis will take, — perhaps Breckenridge. We hope & expect to carry about

From what I know of Dr. Lindley's way of illustrating lectures, and of putting up microscopical illustrations I should say that the collection on sale is very important for the purpose, and that Mr. Shaw might do well to become it.

Alex. Agassiz was married a week ago.

Pauline is to be married a week hence

You delight me by saying you will come next summer, & sit down here awhile, to study.

The Linosyris you enclose, from your brother's collection is plainly enough L. graveolens, — glabrate, — the minute hoariness still visible on young parts. L. viscidiflora is sometimes so also.

Hooker's original L. viscidiflora (and name) was too young. But my comparisons at Kew made it same with Bunke's Rky. Mts. (B & H) — of which I send you fragments.

What I take for L. viscidiflora is my

doubt "L. serrulata" — but a good deal of matter is confused under this head. Probably

I have small faith in L. alli=
caulis

I pick up a bit of L. Bigelovii for you.

Aquilegia leptoceras, figd in Bot. Mag. t. 4407 = A. macrantha, Bot. Beech. Voy. t. 72.

Lepidium flavum, Torr. (Bigelow & Fremont) with yellow flowers & pinnatifid leaves, we have only in young state. But the young do resemble those of the plant you send. If your rad. leaves are pinnatifid there will be no doubt.

BOTANICAL GARDEN
ENGELMANN PAPERS

I have ready for you the parcel of Journal of the Proceedings Linnean Society — will cost you, all put up= listed $5.63,

Here is ~~Dort~~ Torrey, with leaves 11 or 12 inches long, coll. by Wm Boott, in W. Cambridge last summer, — as long as your Ruby T. lacustris? And Torrey is the last plant for Britain. Ever Yrs A Gray

Dear Engelmann.

Pauline Agassiz
is married to-day, & gone
abroad for a long while.
A rich husband,
Yours of 21. ~~received~~
received one from me.

We had found out the
error about the position
of the parts of Papaver
bleeri Lecta & C. aurea,
are the same thing.
I suppose the figure is not
right.

Yours Gray ed. of Torr=
rey has been noticed in
the Bot. Zeitung - some
time ago.

Dear E.

I have a few

Euphorbia from a

S. Californian coll. I

am expecting — / 2

certainly not in Bot. Surv.

You can describe

them for Mission — if

new. — Send me your

notes, as I will soon print

a little paper about them

— a number of new sp.

Yours ever

A Gray

Recipe for the country,
Admit all the terri=
tories at once as States
— or annex unpeopled
territory to existing States,
— Have done with the
Territorial question —
Slack or white — and
do not annex any
more!
